			Endotoxin Level: Please contact the lab for more information		
			Reconstitution	Reconstitution:	Shipping:
			and Storage	Reconstitute at 0.25 $\mu$ g/ $\mu$ l in 200 $\mu$ l sterile water for short- term storage.	The product is shipped at ambient temperature.
				After reconstitution with sterile water, if glycerol has no effect	Upon receipt, store it immediately at the recommended temperature (see below).
		on subsequent experiments, it is recommended to add an			
	equal volume of glycerol for long-term storage (see Stability and Storage for more details).				
If a different concentration is needed for your purposes please					
adjust the reconstitution volume as required (please note: the					
ion concentration of the final solution will vary according to the volume used).					
Note: Centrifuge vial before opening. When reconstituting,					
gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.					
Purity	85%, by SDS-PAGE with Coomassie Brilliant Blue staining.				
Formulation	The purified protein was Lyophilized from sterile PBS (58mM Na2	HPO4, 17mM NaH2PO4, 68mM NaCl, pH7.4). 5 %			
	trehalose and 5 % mannitol are added as protectant before lyophi imidazole.	lization. The elution buffer contain 300mM			
Stability and Storage	Store for up to 12 months at -20°C to -80°C as lyophilized powder.				
Storage of	Short Term Storage:				
Reconstituted Protein	Store at 2-8°C for (1-2 weeks).				
Reconstituted Protein	Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, buffer				
	containing 50% glycerol is recommended for reconstitution.				
	Avoid repeat freeze-thaw cycles.				
Selected Validation Data	_				
	$\begin{array}{c} 74 \ \mathrm{kBa}_{\mathrm{a}} \rightarrow & \\ 66 \ \mathrm{kDa}_{\mathrm{a}} \rightarrow & \end{array}$				
	43 kDa→ ←43 kDa				
	28 kDa→				

20 kD
