| Reconstitution | Reconstitution: | Shipping: |
| and Storage | Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short- term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. | The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature (see below). |
| Purity | 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. | |
