and Storage	term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please	Upon receipt, store it immediately at the recommended temperature (see below).
	adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used).	
	Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.
