|                                     | Endotoxin Level:<br>Please contact the lab for more information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Reconstitution<br>and Storage       | <ul> <li>Reconstitution:</li> <li>Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short-term storage.</li> <li>After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details).</li> <li>If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used).</li> <li>Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.</li> </ul> | Shipping:<br>The product is shipped at ambient temperature.<br>Upon receipt, store it immediately at the<br>recommended temperature (see below).                                                                                                                                                                                                                                                                                |
| Purity                              | 85%, by SDS-PAGE with Coomassie Brilliant Blue staining.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Formulation                         | The purified protein was Lyophilized from sterile PBS (58mM Na2HPO4, 17mM NaH2PO4, 68mM NaCl, pH7.4). 5 %<br>trehalose and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 300mM<br>imidazole.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Stability and Storage               | Store for up to 12 months at -20°C to -80°C as lyophilized powder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Storage of<br>Reconstituted Protein | Short Term Storage:<br>Store at 2-8°C for (1-2 weeks).<br>Long Term Storage:<br>Aliquot and store at -20°C to -80°C for up to 3 months, buffer<br>containing 50% glycerol is recommended for reconstitution.<br>Avoid repeat freeze-thaw cycles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                 |
