Recombinant human TUBD1 protein

Catalog Number:	Peptide Sequence:
Ag26641 Form: Available lyophilized	LSDSHSSQGLCSMRENEAYQASCKERFFSEEENGVPI ARAVLVDMEPKVINQMLSKAAQSGQWKYGQHACF CQKQGSGNNWAYGYSVHGPRHEESIMNIIRKEVEKC
Species: human	DSFS (24-134 aa encoded by BC000258)
Expression Source: <i>e coli.</i> -derived, PET28a, with N-terminal 6*His.	
Biological Activity: Not tested	
Endotoxin Level: Please contact the lab for more information	
 Reconstitution: Reconstitute at 0.25 μg/ μ l in 200 μ l sterile water for short-term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. 	Shipping: The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature (see below).
85%, by SDS-PAGE with Coomassie Brilliant Blue staining.	
The purified protein was Lyophilized from sterile PBS (58mM Na 2 trehalose and 5 % mannitol are added as protectant before lyophi imidazole.	
Store for up to 12 months at -20°C to -80°C as lyophilized powder.	
Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, buffer containing 50% glycerol is recommended for reconstitution. Avoid repeat freeze-thaw cycles.
