| | | Endotoxin Level: Please contact the lab for more information | |
| | | Reconstitution: | Shipping: |
| | | The product is shipped at ambient temperature. | |
| After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full | experiments, it is recommended to add an of glycerol for long-term storage (see Stability more details). ncentration is needed for your purposes please isstitution volume as required (please note: the on of the final solution will vary according to d). e vial before opening. When reconstituting, d wash down the sides of the vial to ensure full | | |
| 85%, by SDS-PAGE with Coomassie Brilliant Blue staining. | | | |
| The purified protein was Lyophilized from sterile PBS (58mM Na2H trehalose and 5 % mannitol are added as protectant before lyophi imidazole. | | | |
| Store for up to 12 months at -20°C to -80°C as lyophilized powder. | | | |
| Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, buffer containing 50% glycerol is recommended for reconstitution. Avoid repeat freeze-thaw cycles. | | | |
| 71105 | | | |
| 66 KBa→ 43 kDa→ 28 kDa→ ← 31 kDa | | | |
| | <section-header> Form: Available lyophilized Species: virus Expression Source: c coli. derived, PET28a, with N-terminal 6*His. Blogical Activity: Not tested Brocostitute at 0.25 µg/ µ l in 200 µ l sterile water for shortsem storage (see Stability and Storage for more details). After reconstitution with sterile water, if glycerol has no effect on concentration is needed for your purposes please and storage for more details). After reconstitution volume as required (please note: the ino concentration is needed for your purposes please and storage for more details). After reconstitution volume as required (please note: the ino concentration of the final solution will vary according to the volume used). Not centrifyee viab before opening. When reconstituting genty pipet and wash down the sides of the vial to ensure full ecovery of the protein into solution. Styk by SDS-PAGE with Coomassie Brilliant Blue staining. The purified protein was Lyophilized from sterile PBS (S&mM Na2t the habese and 5% mannitol are added as protectant before lyophilinidazole. Store for up to 12 months at -20°C to -80°C as lyophilized powers, buffer constitution jo S0% glycerol is recommended for reconstitution. May and store at -20°C to -80°C for up to 3 months, buffer constrained S0 mannitol are added as protectant before lyophilinidazole. Diate and store at -20°C to -80°C for up to 3 months, buffer constreacting S0% glycerol is recommended for reconstitut</section-header> | | |
