| Form: Available lyophilized | |
| Species: human | |
| Expression Source: <i>e coli.</i> -derived, PET28a, with N-terminal 6*His. | |
| Biological Activity: Not tested | |
| Endotoxin Level: Please contact the lab for more information | |
| Reconstitution: Reconstitute at 0.25 µg/ µl in 200 µl sterile water for short-term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. | Shipping: The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature (see below). |
| 80%, by SDS-PAGE with Coomassie Brilliant Blue staining. | |
| The purified protein was Lyophilized from sterile PBS (58mM Na2H trehalose and 5 % mannitol are added as protectant before lyophi imidazole. | • |
| Store for up to 12 months at -20°C to -80°C as lyophilized powder. | |
| Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, buffer containing 50% glycerol is recommended for reconstitution. Avoid repeat freeze-thaw cycles. | |
