Please contact the lab for more information Reconstitution And Storage Reconstitution After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for incorper-missing sterile (Samithi, and Storage for more details). The different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the inconcentration of the final solution will water it experiments). Note: Centrifyer val before opening. When reconstituting, genty pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. Shippin: The purified protein was lyophilized from sterile PBS (SBmN Na2HPO4,17mM NaH2PO4, 68mM NaCL, pH8). 5 % treatases and 5 % mannitol are added as protectant before lyophilization. The elution buffer contain 100mM CSH. Stability and Storage of Reconstituted Protein Store for up to 12 months at -20°C to -80°C as lyophilized powder. Storage of Reconstituted Protein Store for (1-2 weeks). Long lem Storege: Storage of Reconstituted Protein Stelected Validation Data Up in the storege: Storage of protein and store at -20°C to -80°C for up to 3 months, buffer containing 59% glycero is recommended for reconstitution. Avoid repeat-freez-thew cycles. Stelected Validation Data Up in the store of the store due for econstitution. Avoid repeat-freez-thew cycles.
