|                                     |  |   | and Storage           | Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short-<br>term storage.<br>After reconstitution with sterile water, if glycerol has no effect<br>on subsequent experiments, it is recommended to add an<br>equal volume of glycerol for long-term storage (see Stability<br>and Storage for more details).<br>If a different concentration is needed for your purposes please<br>adjust the reconstitution volume as required (please note: the<br>ion concentration of the final solution will vary according to<br>the volume used).<br>Note: Centrifuge vial before opening. When reconstituting,<br>gently pipet and wash down the sides of the vial to ensure full<br>recovery of the protein into solution. | The product is shipped at ambient temperature.<br>Upon receipt, store it immediately at the<br>recommended temperature (see below). |

The elution buffer contain 300mM<br>imidazole.<br>Store for up to 12 months at -20°C to -80°C as lyophilized powder.  |   |
