For Research Use Only

CoraLite® Plus 488-conjugated Zyxin Polyclonal antibody

Catalog Number:CL488-10330

Featured Product

Basic Information

Catalog Number: CL488-10330

Size:

BC008743 GeneID (NCBI): 1000 ug/ml

UNIPROT ID: Source: Rabbit Q15942 Full Name: Isotype: zyxin

Calculated MW: Immunogen Catalog Number:

AG0419 80 kDa

> Observed MW: 78 kDa

GenBank Accession Number:

Purification Method:

Antigen affinity purification Recommended Dilutions: IF/ICC 1:50-1:500

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

Applications

Tested Applications:

IF/ICC

Species Specificity:

human

Positive Controls:

IF/ICC: A549 cells,

Background Information

Focal adhesions are actin-rich structures that enable cells to adhere to the extracellular matrix and at which protein complexes involved in signal transduction assemble. Zyxin (ZYX) is a zinc-binding phosphoprotein that concentrates at focal adhesions and along the actin cytoskeleton. Zyxin has an N-terminal proline-rich domain and three LIM domains in its C-terminal half. The proline-rich domain may interact with SH3 domains of proteins involved in signal transduction pathways while the LIM domains are likely involved in protein-protein binding. Zyxin may function as a messenger in the signal transduction pathway that mediates adhesion-stimulated changes in gene expression and may modulate the cytoskeletal organization of actin bundles.

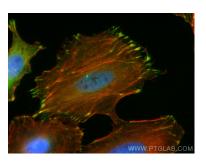

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed A549 cells using Coralite® Plus 488 Zyxin antibody (CL488-10330) at dilution of 1:200, CL594-phalloidin (red).
