For Research Use Only

## CoraLite® Plus 488-conjugated AEG-1/MTDH Polyclonal antibody

Catalog Number: CL488-13860

Featured Product

**Basic Information** 

Catalog Number:

CL488-13860 Size: 1000 ug/ml Source: Rabbit Isotype:

Immunogen Catalog Number:

Calculated MW: AG4840 582 aa, 64 kDa Observed MW: 65-70 kDa

**Purification Method:** Antigen affinity purification Recommended Dilutions: IF/ICC 1:50-1:500

Excitation/Emission maxima wavelengths: 493 nm / 522 nm

**Applications** 

**Tested Applications:** IF/ICC, FC (Intra) Species Specificity: human, mouse

Positive Controls:

IF/ICC: MCF-7 cells,

## **Background Information**

MTDH, also known as AEG-1, is a single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 , the accordance of the single-pass transmembrane protein with its gene located at chromosome 8q22 . The single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with its gene located at the single-pass transmembrane protein with the single-pass transmembrane proteinabnormalities of which have been identified in several tumor types. MTDH is overexpressed in a number of malignancies, such as breast cancer, malignant glioma, and neuroblastoma, and its overexpression is associated  $with poor clinical outcome. \ MTDH \ plays \ an important \ role \ in \ the \ regulation \ of \ carcinogenesis \ and \ tumor \ progression.$ This antibody got two bands about 70 kDa and 80 kDa in western blotting, possibly due to posttranslational modification.

GenBank Accession Number:

BC045642

92140

Q86UE4

Full Name:

metadherin

GeneID (NCBI):

**UNIPROT ID:** 

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

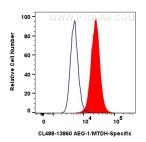

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

Immunofluorescent analysis of (-20°C Methanol) fixed MCF-7 cells using Coralite® Plus 488 AEG-1/MTDH-Specific antibody (CL488-13860) at dilution of 1:200.

1x10^6 HeLa cells were intracellularly stained with 0.8 ug Coralite® Plus 488 Anti-Human AEG-1/MTDH-Specific (CL488-13860) (red), or 0.8 ug Coralite® Plus 488-conjugated Rabbit 1gG control Rabbit PolyAb (CL488-30000, Clone:) (blue). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
