For Research Use Only

CoraLite® Plus 488-conjugated SMARCA4/BRG1 Recombinant antibody

Catalog Number: CL488-83310-2

Basic Information

Catalog Number: CL488-83310-2 Concentration: 1000 ug/ml

Source: Rabbit Isotype:

Immunogen Catalog Number:

AG16256

GenBank Accession Number:

BC150298 GeneID (NCBI): **UNIPROT ID:** P51532 Full Name:

SWI/SNF related, matrix associated, actin dependent regulator of chromatin, subfamily a, member 4

Calculated MW: 1647 aa, 185 kDa Observed MW: 185 kDa

Purification Method:

Protein A purification CloneNo.:

240172F4 Recommended Dilutions: IF/ICC 1:50-1:500

Excitation/Emission maxima

wavelengths: 493 nm / 522 nm

Applications

Tested Applications: IF/ICC

Species Specificity:

human, mouse, rat

Positive Controls:

IF/ICC: HepG2 cells,

Background Information

SMARCA4, also named as BAF190A, BRG1, SNF2B and SNF2L4, belongs to the SNF2/RAD54 helicase family. SMARCA4 is a transcriptional coactivator cooperating with nuclear hormone receptors to potentiate transcriptional activation. It is a component of the CREST-BRG1 complex, a multiprotein complex that regulates promoter activation by orchestrating a calcium-dependent release of a repressor complex and a recruitment of an activator $complex. \ It is also involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association with the WINAC involved in vitamin D-coupled transcription regulation via its association via its associati$ complex, a chromatin-remodeling complex recruited by vitamin D receptor (VDR), which is required for the ligandbound VDR-mediated transrepression of the CYP27B1 gene.

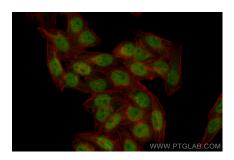

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer:

PBS with 50% glycerol, 0.05% Proclin300, 0.5% BSA, pH7.3

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed HepG2 cells using Coralite® Plus 488 SMARCA4 antibody (CL488-83310-2, Clone: 240172F4) at dilution of 1:200.
