For Research Use Only

## CoraLite® Plus 488-conjugated FOXK2 Recombinant antibody

Catalog Number:CL488-83735-6 Featured Product

**Basic Information** 

Catalog Number: CL488-83735-6

Concentration: 1000 ug/ml Source: Rabbit

Immunogen Catalog Number:

AG33625

Isotype:

69-79 kDa

**Tested Applications:** IF/ICC

Species Specificity:

human

GenBank Accession Number:

NM\_004514.3 GeneID (NCBI):

**UNIPROT ID:** 

Q01167 Full Name:

forkhead box K2 Calculated MW:

69 kDa Observed MW: **Purification Method:** 

Protein A purification

CloneNo.: 240692H4

Recommended Dilutions: IF/ICC: 1:50-1:500

Excitation/Emission maxima wavelengths:

493 nm / 522 nm

**Background Information** 

**Applications** 

FOXK2 (forkhead box K2), also known as ILF and ILF1. FOXK2 is localized at nucleus and cytoplasm. It is also expected to be expressed in testis, brain and lymphoid and non-lymphoid cells (PMID: 1339390). The protein encoded by this gene contains a fork head DNA binding domain. This protein can bind to the purine-rich motifs of the HIV long terminal repeat (LTR), and to the similar purine-rich motif in the interleukin 2 (IL2) promoter. It may be involved in the regulation of viral and cellular promoter elements. And its molecular weight is 69 kDa. Anett Marais demonstrate that FOXK2 is phosphorylated in a cell cycle-dependent manner. This phosphorylation peaks during Mphase and is mediated by CDK-cyclin complexes. FOXK2 exhibits a periodic rise in its phosphorylation levels during the cell cycle, with hyperphosphorylation occurring in mitotic cells (PMID: 20810654).

Positive Controls:

IF/ICC: A431 cells,

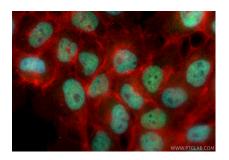

Storage

Store at -20°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer

PBS with 50% glycerol, 0.05% Proclin300, 0.5% BSA, pH7.3

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed A431 cells using Coralite® Plus 488 FOXK2 antibody (CL488-83735-6, Clone: 240692H4) at dilution of 1:200, CL594-Phalloidin (red).
