

For Research Use Only

CoraLite® Plus 488 Anti-Mouse GM-CSF Rabbit Recombinant Antibody

Catalog Number: CL488-98014

Basic Information

Catalog Number:

CL488-98014

Size:

100ug, 500 ug/ml

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

NM-009969

GeneID (NCBI):

12981

UNIPROT ID:

P01587

Full Name:

colony stimulating factor 2
(granulocyte-macrophage)

Purification Method:

Protein A purification

CloneNo.:

230286E11

Excitation/Emission maxima
wavelengths:

493 nm / 522 nm

Applications

Tested Applications:

FC (Intra)

Species Specificity:

mouse

Background Information

Gm-csf, also known as Csf2, is a monomeric glycoprotein secreted by macrophages, T cells, mast cells, NK cells, endothelial cells and fibroblasts that functions as a cytokine. Gm-csf was first characterized as a hematopoietic growth factor that stimulates the proliferation of myeloid cells from bone-marrow progenitors. Gm-csf is now recognized as an important activating and differentiation factor for immune cells, and is essential for a wide range of biological processes in both innate and adaptive immunity. Gm-csf has been shown to protect against pulmonary infection and intestinal inflammation, and it is necessary for normal pulmonary and colon homeostasis.

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide.

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1x10⁶ unstimulated (left) or PMA and ionomycin stimulated (in the presence of protein transport inhibitors) (right) C57BL/6 CD3 T cells were intracellularly stained with 0.25 ug CoraLite® Plus 488 Anti-Mouse Gm-csf Rabbit Recombinant Antibody (CL488-98014, Clone:23O286E11) and APC Anti-Mouse CD3. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
