For Research Use Only

CoraLite®555-conjugated TNP1 Polyclonal antibody

Purification Method:

IF 1:50-1:500

wavelengths: 557 nm / 570 nm

Antigen affinity purification

Excitation/Emission maxima

Recommended Dilutions:

Catalog Number: CL555-17178

Basic Information

Catalog Number: CL555-17178

Size: 1000 µg/ml Source: Rabbit

Isotype:

Immunogen Catalog Number:

AG10890

Tested Applications: IF-Fro,IF-P

Species Specificity: human, mouse, rat

GenBank Accession Number:

BC029516 GeneID (NCBI): 7141

UNIPROT ID: P09430 Full Name:

transition protein 1 (during histone to protamine replacement)

Calculated MW: 55 aa, 7 kDa Observed MW:

6-10 kDa

Positive Controls:

IF: mouse testis tissue,

Background Information

Transition nuclear proteins (TNP1 and TNP2) are the major nuclear proteins that replace somatic histones during spermatogenesis. TNPs are required for normal chromatin condensation and functional sperm development, spermatogenesis was found to be compromised in both Tnp1 and Tnp2 null mice. TNP1, or TP1, localized in nucleus, is a spermatid-specific product of the haploid genome which replaces histone and is itself replaced in the mature sperm by the protamines. Recently, TNP-1 was used as a germ cell marker in condensing spermatids.

Storage

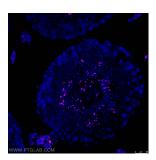

Applications

Store at -20°C. Avoid exposure to light. Stable for one year after shipment.

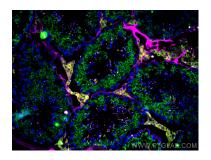

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed mouse testis tissue using Coralite®555 TNP1 antibody (CL555-17178) at dilution of 1:100.

Immunofluorescent analysis of (4% PFA) fixed mouse testis tissue using Coralite®555 TNP1 antibody (CL555-17178) at dilution of 1:100, Coralite® Plus 488 BOULE antibody (CL488-13720, green), STAR antibody (67130-1-lg, Clone: 1G6E6, Magenta).
