## **Background Information**

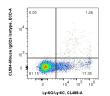

Triggering receptor expressed on myeloid cells 1 (TREM-1, also known as CD354) is a member of the  $immunog lobulin\ superfamily,\ which\ is\ expressed\ on\ neutrophils\ and\ monocytes.\ TREM1\ plays\ a\ role\ in\ the\ innate$ immune system. TREM1 amplifies neutrophil and monocyte-mediated inflammatory responses triggered by bacterial and fungal infections by stimulating release of pro-inflammatory chemokines and cytokines, as well as increased surface expression of cell activation markers.

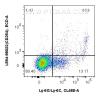

Storage

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer:
