For Research Use Only

CoraLite®594 Anti-Mouse CD45.2 Rabbit Recombinant Antibody

Catalog Number: CL594-98168

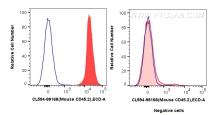

Basic Information	Catalog Number: CL594-98168 Size: 100ug, 500 µ g/ml Source: Rabbit Isotype: IgG	GenBank Accession Number: GeneID (NCBI): 19264 Full Name: protein tyrosine phosphatase, receptor type, C	Purification Method: Protein A purification CloneNo.: 240922E12 Excitation/Emission maxima wavelengths: 588 nm / 604 nm
Applications	Tested Applications: FC Species Specificity: mouse		
Background Information	CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097). Allelic variants of mouse CD45, CD45.1 (Ly5.1) and CD45.2 (Ly5.1), have been established as a marker system to track haematopoietic cells following congenic mouse bone marrow transplants (PMID: 28615666). CD45.2 is the common form and is expressed by most of the established strains, while CD45.1 is found in only a few like the SJL mouse strain (PMID: 3489673).		
Storage	Storage: Store at 2-8°C. Avoid exposure to lig Storage Buffer: PBS with 0.09% sodium azide.	ht. Stable for one year after shipment	<u>.</u>

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1x10^6 C57BL/6 mouse splenocytes (left) or SJL mouse splenocytes (right) were surface stained with 0.25 ug CoraLite®594 Anti-Mouse CD45.2 Rabbit Recombinant Antibody (CL594-98168, Clone: 240922E12) (red) or CoraLite®594 Rabbit IgG Isotype Control Recombinant Antibody (CL594-98136, Clone: 240953C9) (blue). Cells were not fixed.
