For Research Use Only

## CoraLite® Plus 647-conjugated TGF beta 1 Monoclonal antibody

Catalog Number: CL647-69012

**Basic Information** 

Catalog Number:

CL647-69012

Size:

1000 µg/ml

Source: Mouse

Isotype: lgG1

Immunogen Catalog Number:

HZ-1011

GenBank Accession Number:

GeneID (NCBI):

7040 Full Name:

transforming growth factor, beta 1

**Purification Method:** 

Protein G purification

CloneNo.: 1E3E9

Excitation/Emission maxima

wavelengths: 654 nm / 674 nm

**Applications** 

**Tested Applications:** 

FC (Intra)

Species Specificity:

Human

**Background Information** 

TGFB, also named as LAP and TGFB1, is a multifunctional peptide that controls proliferation, differentiation, and other functions in many cell types. TGFB acts synergistically with TGFA in inducing transformation. It also acts as a negative autocrine growth factor. Dysregulation of TGFB activation and signaling may result in apoptosis. Many cells synthesize TGFB and almost all of them have specific receptors for it. TGFB positively and negatively regulates many other growth factors. It plays an important role in bone remodeling as it is a potent stimulator of osteoblastic bone formation, causing chemotaxis, proliferation and differentiation in committed osteoblasts. It is highly expressed in bone. Mutation of TGFB are the cause of Camurati-Engelmann disease (CED) which known as progressive diaphyseal dysplasia 1 (DPD1).

This antibody is used to Block/Neutralize TGF beta 1 protein.

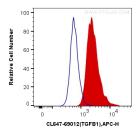

Storage

Store at -20°C. Avoid exposure to light.

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

## Selected Validation Data

1X10^6 HEK-293 cells were intracellularly stained with 0.4 ug CoraLite® Plus 647 Anti-Human TGF beta 1 (CL647-69012, Clone:1E3E9) (red), or 0.4 ug Control Antibody. Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C).
