**Background Information** 

CD45, also known as protein tyrosine phosphatase, receptor type C, is a type I transmembrane protein expressed on the surface of all haematopoietic cells with the exception of erythrocytes and platelets (PMID: 3489673; 28615666). CD45 is a pan-haematopoietic cell marker and has been shown to be essential for T- and B-cell activation and signalling (PMID: 9429890; 16378097).

## **Selected Validation Data**

1x10^6 human peripheral blood leukocytes were surface stained with 5 ul Coralite® Plus 647 Anti-Human CD45 Rabbit Recombinant Antibody (CL647-98117, Clone: 241670E10) or Coralite® Plus 647 Rabbit IgG Isotype Control Recombinant Antibody (CL647-98136, Clone: 240953C9). Cells were incubated with FC Receptor Block prior to staining. Cells were not fixed.
