For Research Use Only

## CoraLite® Plus 750 Anti-Human CD47 Rabbit Recombinant Antibody

Catalog Number: CL750-98131

**Basic Information** 

Catalog Number: CL750-98131

Concentration: 100tests, 5 ul/test

Source: Rabbit Isotype:

oott Otype: G

GenBank Accession Number: BC010016

GeneID (NCBI):

UNIPROT ID: Q08722 Full Name:

CD47 molecule
Calculated MW:
323 aa, 35 kDa

Purification Method:

Protein A purification CloneNo.:

Excitation/Emission maxima

wavelengths: 755 nm / 780 nm

240997D8

**Applications** 

**Tested Applications:** 

FC

Species Specificity:

human

## **Background Information**

CD47, also known as integrin-associated protein (IAP), is a member of the immunoglobulin superfamily containing a five-pass transmembrane attachment. CD47 is heavily glycosylated and widely expressed by hematopoietic and nonhematopoietic cells. CD47 interacts with several membrane integrins and also acts as a receptor for thrombospondin (THBS1). It is involved in a range of cellular processes, including apoptosis, proliferation, adhesion, and migration. CD47 also functions as a ligand for signal regulatory protein-  $\alpha$  (SIRP  $\alpha$ ). Upon binding CD47, SIRP  $\alpha$  initiates a signaling cascade that results in the inhibition of phagocytosis.

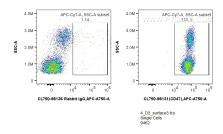

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment. Storage Ruffer

PBS with 0.09% sodium azide and 0.5% BSA.

## **Selected Validation Data**

Relative Cell Number

1x10^6 FC receptor blocked human PBMCs were surface stained with 5 ul CoraLite® Plus 750 Anti-Human CD47 Rabbit RecAb (CL750-98131, Clone: 240997D8) or CoraLite® Plus 750 Rabbit IgG Isotype Control RecAb (CL750-98136, Clone: 240953C9). Cells were not fixed.

1x10^6 FC receptor blocked human PBMCs were surface stained with 5 ul CoraLite® Plus 750 Anti-Human CD47 Rabbit RecAb (CL750-98131, Clone: 240997D8) (red) or CoraLite® Plus 750 Rabbit IgG Isotype Control RecAb (CL750-98136, Clone: 240953C9) (blue). Cells were not fixed.
