

Catalog Number: CM03232

## 产品信息

**Catalog Number:**  
CM03232

**CAS号:**  
499-44-5

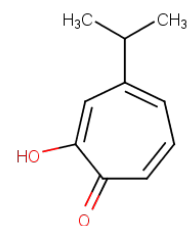

**分子式:**  
C<sub>10</sub>H<sub>12</sub>O<sub>2</sub>

**主要靶点:**  
Virus  
Protease|Estrogen/progestogen  
Receptor|DNA  
Methyltransferase|Nrf2

**主要通路:**  
表观遗传|微生物学|免疫与炎症|内  
分泌与激素

**分子量:**  
164.2

**溶解度:**  
Chloroform:Soluble,DMSO:29  
mg/mL(176.6 mM)

## 描述

β -thujaplicin can inhibit ultraviolet B-induced apoptosis in keratinocytes and strongly suggest that the inhibitory mechanism is due to the antioxidant activity of metallothionein induced by the agent. Also, β -Thujaplicin modulates estrogen receptor signaling and inhibits proliferation of human breast cancer cells.

## 储存

Powder: -20°C for 3 years | In solvent: -80°C for 2 years
