

Catalog Number: CM04874

产品信息

Catalog Number:
CM04874

CAS号:
25406-64-8

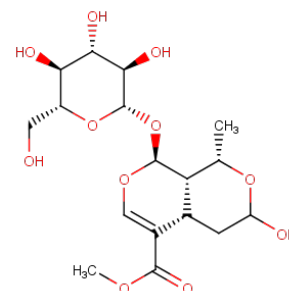

分子式:
C₁₇H₂₆O₁₁

主要靶点:
Apoptosis|Pyroptosis|MMP

主要通路:
免疫与炎症|凋亡|蛋白酶体

分子量:
406.38

溶解度:
Ethanol:73 mg/mL(179.6 mM),Pyridine, Methanol:Soluble

描述

Morrioniside would act as a regulator of hepatic inflammatory reactions and lipid metabolism in db/db mice. It exhibits protective effects against diabetic renal damage and human umbilical vein endothelial cells, by inhibiting hyperglycemia and oxidative stress. Morrioniside can notably protect the brain from damage induced by focal cerebral ischemia which might be related to morrioniside antioxidant and anti-apoptotic properties in the brain.

储存

Powder: -20°C for 3 years | In solvent: -80°C for 1 year
