

Catalog Number: CM13910

产品信息

Catalog Number:
CM13910

分子量:
147 kDa (average)

CAS No.: 1228763-95-8

CAS号:
1228763-95-8

分子式:

主要靶点:
IFNAR|Chk

主要通路:
免疫与炎症|细胞周期

体外活性

NK cells were incubated with monalizumab (1 μ g/mL) at 4°C for 30 minutes, followed by detection of total surface NKG2A using anti-human IgG4 (Fc)-PE. The results showed that monalizumab enhances the anti-tumor activity of human NK cells[1].

体内活性

Mice were intravenously injected with 200 μ g of monalizumab, with an interval of 3-4 days, followed by intraperitoneal injection of 200 μ g of RMP1-14. The results showed that monalizumab and RMP1-14 have synergistic effects in preclinical mouse tumor models[1].
