For Research Use Only

Cardinal Red™-conjugated PTEN Polyclonal antibody

Catalog Number: CR-22034

Featured Product

Basic Information

Catalog Number:

CR-22034

Size:

1 mg/mL

Source:

Rabbit

Source:

Rull Name:

GenBank Accession Number:

GeneID (NCBI):

5728

UNIPROT ID:

Flour Number:

Full Name:

gG phosphatase and tensin homolog

Immunogen Catalog Number: Calculated MW: AG17274 47 kDa

Observed MW: 55 kDa, 68 kDa Purification Method: Antigen affinity purification Excitation/Emission maxima

wavelengths: 592 nm / 611 nm

Applications

Tested Applications: Species Specificity: human, mouse

Background Information

PTEN(Phosphatase and tensin homolog) is also named as MMAC1, TEP1 and it modulates cell cycle progression and cell survival (blockage) through down-regulating the positive cell cycle-regulator (cycle D1) by its phosphatase activity and up-regulating the negative cell cycle regulator p21 (by its lipid phosphatase activity). PTEN is an important tumor suppressor whose inactivation frequency in cancers is ranked second after p53 tumor suppressor inactivation. PTEN is a 403-residue protein structured in an amino (N)-terminal phosphatase domain and a carboxy (C)-terminal C2 domain that binds phospholipid membranes.(PMID:14749127). There are some report showing that SUMOylation appears to be a positive regulator in controlling PTEN membrane association, whereas phosphorylation is a negative regulator that may neutralize SUMOylation through intramolecular electrostatic interactions (PMID:22713753). This antibody can recognize two isoforms with MW of 55kDa and 68 kDa.

Storage

Storage:

Store at -20°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer:

PBS with 50% Glycerol, 0.05% Proclin300, 0.5% BSA, pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data
