For Research Use Only

Cardinal Red™ Anti-Human CD163 (GHI/61)

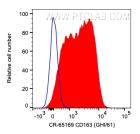

Catalog Number: CR-65169

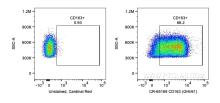

Basic Information	Catalog Number: CR-65169	GenBank Accession Number: BC051281	Purification Method: Purified by protein-A affinity chromatography CloneNo.: GHI/61 Excitation/Emission maxima wavelengths: 592 nm / 611 nm	
	Size: 100tests, 5 ul/test	GeneID (NCBI): 9332 ENSEMBL Gene ID: ENSG00000177575 UNIPROT ID: Q86VB7 Full Name: CD163 molecule		
	Source: Mouse			
	lsotype: IgG1, kappa			
				Calculated MW: 1156 aa, 125 kDa
		Applications		Tested Applications: FC
Species Specificity: Human				
Background Informatio	(PMID: 8370408). It is an acu monocytes and tissue macro complexes (PMID: 11196644 also to the inflammatory res during inflammatory activation	CD163, also known as M130, is a membrane glycoprotein which belongs to the scavenger receptor superfamily (PMID: 8370408). It is an acute phase-regulated and signal-inducing macrophage protein expressed exclusively in monocytes and tissue macrophages (PMID: 11196644). CD163 mediates endocytosis of haptoglobin-haemoglobin complexes (PMID: 11196644). The uptake of haptoglobin by macrophages contributes to the recycling of iron and also to the inflammatory response (PMID: 22900885). Soluble CD163 (sCD163), as a result of ectodomain shedding during inflammatory activation of macrophages, circulates in blood and has been suggested as a plasma/serum marker for macrophage activity (PMID: 12570164).		
Storage	Storage: Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment. Storage Buffer: PBS with 0.09% sodium azide and 0.5% BSA.			

For technical support and original validation data for this product please contact:T: 4006900926E: Proteintech-CN@ptglab.comW: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10[^]6 human PBMCs were surface stained with 5 ul Cardinal Red[™] Anti-Human CD163 (CR-65169, Clone:GHI/61) or unstained. Cells were not fixed. Monocytes and granulocytes were gated.

1X10^6 human PBMCs were surface stained with 5 ul Cardinal Red[™] Anti-Human CD163 (CR-65169, Clone:GHI/61) (red) or unstained. Cells were not fixed. Monocytes and granulocytes were gated.
