## For Research Use Only

## Cardinal Red™ Anti-Human ALCAM (3A6)

Catalog Number: CR-65223

**Basic Information** 

Catalog Number:

CR-65223

Size:

100tests, 5  $\mu$ l/test

Source: Mouse

Isotype: IgG1, kappa

Calculated MW:

GenBank Accession Number:

activated leukocyte cell adhesion

105 kDa

BC057809

GeneID (NCBI):

**UNIPROT ID:** 

Full Name:

molecule

Q13740

**Purification Method:** Affinity purification

CloneNo.:

Excitation/Emission maxima

wavelengths: 592 nm / 611 nm

**Applications** 

**Tested Applications:** 

Species Specificity:

**Background Information** 

Activated leukocyte cell adhesion molecule (ALCAM, also known as CD166) is a cell adhesion molecule that belongs to the immunoglobulin superfamily. It is involved in cell-cell adhesion through homophilic and heterophilic (to CD6) interactions. ALCAM is widely expressed in a variety of normal tissues and cell types, including activated T cells and monocytes, epithelial cells, fibroblasts, neuronal cells, hepatocytes, and bone marrow mesenchymal stem cells (PMID: 7760007; 25221999). Altered ALCAM expression has been associated with  $the \ differentiation \ state \ and \ progression \ in \ some \ neoplasms \ including \ melanoma, \ prostate, \ colorectal, \ and \ breast$ cancers (PMID: 20461761; 18172759).

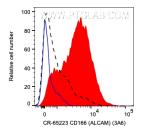

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA.

## Selected Validation Data

1X10^6 PHA-treated (day 3) human PBMCs were surface stained with 5 ul Cardinal Red™ Anti-Human ALCAM (CR-65223, Clone:3A6) (red), or unstained (blue). The black dashed line indicates unactivated PBMCs surface stained with 5 ul Cardinal Red™ Anti-Human ALCAM (CR-65223, Clone:3A6). Cells were not fixed. Monocytes were gated.
