

For Research Use Only

Recombinant Human SELPLG/CD162 protein (rFc Tag)

Catalog Number: Eg1692

Basic Information

Species:
Human

Purity:
>90 %, SDS-PAGE

Tag:
rFc Tag

Technical Specifications

Purity:

>90 %, SDS-PAGE

Endotoxin Level:

<0.1 EU/ μ g protein, LAL method

Source:

HEK293-derived Human SELPLG protein Gln42-Cys320 (Accession# Q14242-1) with a rabbit IgG Fc tag at the C-terminus.

GeneID:

6404

Accession:

Q14242-1

Predicted Molecular Mass:

55.1 kDa

SDS-PAGE:

80-90 kDa, reducing (R) conditions

Formulation:

Lyophilized from 0.22 μ m filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

Biological Activity

Not tested

Storage and Shipping

Storage:

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

SELPLG (selectin P ligand), also known as CD162 or PSGL-1, is a type I transmembrane mucin-like glycoprotein. It is an adhesion molecule expressed on the surface of neutrophils, monocytes, and most lymphocytes as a homodimer of approximately 230-250 kDa (PMID: 7545173; 1378449; 9353350). SELPLG plays a critical role in the early stages of inflammation due to its ability to bind E-selectin (CD62E), L-selectin (CD62L), and P-selectin (CD62P) (PMID: 35597982).

Synonyms

SELPLG, CD162, CLA, P-selectin glycoprotein ligand 1, PSGL 1

Selected Validation Data

Purity of Recombinant Human SELPLG was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
