

Recombinant Human CD68 protein (rFc Tag)

Catalog Number: Eg2061

Basic Information

Species:
Human**Purity:**
>90 %, SDS-PAGE**Tag:**
rFc Tag

Technical Specifications

Purity:

>90 %, SDS-PAGE

Endotoxin Level:

<0.1 EU/ µg protein, LAL method

Source:

HEK293-derived Human CD68 protein Asn22-Ser319 (Accession# P34810-1) with a rabbit IgG Fc tag at the C-terminus.

GeneID:

968

Accession:

P34810-1

Predicted Molecular Mass:

60.8 kDa

SDS-PAGE:

80-110 kDa, reducing (R) conditions

Formulation:

Lyophilized from 0.22 µm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

Biological Activity

Not tested

Storage and Shipping

Storage:

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

CD68 is a 110 kDa transmembrane glycoprotein widely expressed in monocyte cell types, such as macrophages, microglia, and osteoclasts. It is located at the lysosome and plasma membrane and is essential in various physiological and pathological processes, including atherosclerosis formation, inflammation and auto-immunity, bone-resorbing promotion, and tumor progression. It participates in the cellular response to lipopolysaccharide/oxidized low-density lipoprotein particle stimulus and negative regulation of dendritic cell antigen processing and presentation.

Synonyms

CD68, CD68 molecule, GP110, Macrosialin, SCARD1

Selected Validation Data

Purity of Recombinant Human CD68 was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
