

Recombinant Human CD6 protein (rFc Tag)

Catalog Number: Eg2079

Basic Information

Species:
Human**Purity:**
>90 %, SDS-PAGE**Tag:**
rFc Tag

Technical Specifications

Purity:

>90 %, SDS-PAGE

Endotoxin Level:

<0.1 EU/ µg protein, LAL method

Source:

HEK293-derived Human CD6 protein His18-Glu398 (Accession# P30203-1) with a rabbit IgG Fc tag at the C-terminus.

GeneID:

923

Accession:

P30203-1

Predicted Molecular Mass:

66.9 kDa

SDS-PAGE:

80-120 kDa, reducing (R) conditions

Formulation:

Lyophilized from 0.22 µm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.

Biological Activity

Not tested

Storage and Shipping

Storage:

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

CD6 is a type I transmembrane glycoprotein of 105-130 kDa that belongs to the scavenger receptor cysteine-rich superfamily. It is composed of an extracellular region, which consists of three tandem SRCR domains, a transmembrane region, and a cytoplasmic tail devoid of intrinsic catalytic activity but harboring several phosphorylatable residues suitable for intracellular signal transduction. CD6 is expressed by T cells, medullary thymocytes, a subset of B cells and NK cells, and in some cells of the brain. CD6 plays a role in lymphocyte activation, proliferation, and survival processes via interaction with its endogenous ligands.

Synonyms

CD6 molecule, Soluble CD6, T12, T-cell differentiation antigen CD6, TP120

Selected Validation Data

Purity of Recombinant Human CD6 was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
