Storage and Shipping

Storage:

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

- Until expiry date, -20°C to -80°C as lyophilized proteins.
- 3 months, -20°C to -80°C under sterile conditions after reconstitution.

Shipping:

The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.

Reconstitution

Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.

Background

Podoplanin (PDPN) is a transmembrane glycoprotein that plays a role in a variety of biological processes including regulation of blood-lymphatic vessel development, cerebral vascular pattern, and integrity, cell motility, tumorigenesis and metastasis, and mediates tumor cell-induced platelet aggregation in different cancer types. PDPN homologs are found in humans, mice, rats, dogs, and hamsters and are relatively conserved among species.

Selected Validation Data

Purity of Recombinant Mouse Podoplanin was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.

The purity of Mouse Podoplanin/PDPN was greater than 90% as determined by SEC-HPLC.
