

For Research Use Only

Recombinant Human GLP1R protein (rFc Tag)

Catalog Number: Eg4678

Basic Information	Species: Human	Purity: >90 %, SDS-PAGE	Tag: rFc Tag
Technical Specifications	Purity: >90 %, SDS-PAGE Endotoxin Level: <0.1 EU/ μg protein, LAL method Source: HEK293-derived Human GLP1R protein Arg24-Glu139 (Accession# P43220) with a rabbit IgG Fc tag at the C-terminus. GeneID: 2740 Accession: P43220 Predicted Molecular Mass: 39.1 kDa SDS-PAGE: 45-60 kDa, reducing (R) conditions Formulation: Lyophilized from 0.22 μm filtered solution in PBS, pH 7.4. Normally 5% trehalose and 5% mannitol are added as protectants before lyophilization.		
Biological Activity	Not tested		
Storage and Shipping	Storage: It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. • Until expiry date, -20°C to -80°C as lyophilized proteins. • 3 months, -20°C to -80°C under sterile conditions after reconstitution. Shipping: The product is shipped at ambient temperature. Upon receipt, store it immediately at the recommended temperature.		
Reconstitution	Briefly centrifuge the tube before opening. Reconstitute at 0.1-0.5 mg/mL in sterile water.		
Background	GLP1R (glucagon-like peptide-1 receptor) is a G protein-coupled receptor belonging to the secretin receptor super-family, also known as class B. GLP1R is widely distributed in pancreatic islets, muscles, gastrointestinal tract, lung, liver, pancreas, and other tissues or organs. Moreover, GLP1R agonist has been reported to induce autophagy of endometrial carcinoma cells, and high GLP1R expression may be associated with good prognosis of endometrial carcinoma patients, suggesting that GLP1R is likely to participate in the progression of endometrial carcinoma.

Synonyms	GLP1R, GLP 1 R, GLP 1 receptor, GLP 1R, GLP-1 receptor		

Selected Validation Data

Purity of Recombinant Human GLP1R was determined by SDS-PAGE. The protein was resolved in an SDS-PAGE in reducing (R) and non-reducing (NR) conditions and stained using Coomassie blue.
