## Background

CCDC124 is a novel centrosomal and midbody protein that is highly conserved among species. It is ubiquitously expressed with high expression in brain, placenta, liver, spleen, and prostate. At telophase, CCDC124 dissociates from centrosomes and relocalizes to the midzone, subsequently accumulating at the midbody at cytokinesis. It interacts with the Ras-guanine nucleotide exchange factor 1B (RasGEF1B) and is involved in cytokinesis.

## Synonyms

coiled coil domain containing 124, Coiled-coil domain-containing protein 124
