For Research Use Only

PE Anti-Mouse CD31 (390)

Catalog Number: PE-65058

Basic Information

 Catalog Number:
 GenBank Accession Number:
 Purification Method:

 PE-65058
 BC008519
 Affinity purification

 Concentration:
 GeneID (NCBI):
 CloneNo.:

 100ug, 0.2 mg/mL
 18613
 390

Source: UNIPROT ID: Recommended Dilutions: Rat Q08481 Recommended Dilutions: FC: 0.1 ug per 10^6 cells in 100 $\,\mu$ l

Isotype: Full Name: suspension

IgG2a, kappa platelet/endothelial cell adhesion Excitation/Emission maxima molecule 1 wavelengths:

496 nm, 565 nm / 578 nm

Applications

Tested Applications:

FC

Species Specificity:

mouse

Positive Controls:

FC: mouse bone marrow cells.

Background Information

Platelet endothelial cell adhesion molecule-1 (PECAM-1, CD31) is a member of the immunoglobulin gene superfamily of cell adhesion molecules. CD31 is a transmembrane glycoprotein that is highly expressed on the surface of the endothelium, making up a large portion of its intracellular junctions. PECAM-1 is also present on the surface of hematopoietic cells and immune cells including platelets, monocytes, neutrophils, natural killer cells, megakaryocytes and some types of T-cell (PMID: 9011572). As well as its role in cell-cell adhesion, PECAM-1 functions as a signaling receptor, and is involved in important physiological events such as nitric oxide production, regulation of T-cell immunity and tolerance, leukocyte transendothelial migration and inflammation and angiogenesis (PMID: 21183735; 20978210; 17872453; 20634489).

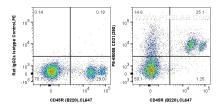

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

Selected Validation Data

1x10^6 mouse bone marrow cells were surface stained with 0.1 ug PE Anti-Mouse CD31 (PE-65058, Clone: 390) or 0.1 ug PE Rat IgG2a Isotype Control (2A3) (PE-65209, Clone: 2A3). Cells were co-stained with APC Anti-Mouse CD45R (B220) (APC-65139, Clone: RA3-6B2). Cells were not fixed.
