

For Research Use Only

FcZero-rAb™ PE Anti-Mouse IL-17A Rabbit Recombinant Antibody

Catalog Number: PE-FcA98005

Basic Information

Catalog Number:

PE-FcA98005

Concentration:

100ug, 200 ug/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

EG0624

GenBank Accession Number:

NM-010552

GeneID (NCBI):

16171

UNIPROT ID:

Q62386

Full Name:

interleukin 17A

Calculated MW:

17 kDa

Purification Method:

Protein A purification

CloneNo.:

230038C7

Recommended Dilutions:

FC (Intra): 0.1 ug per 10⁶ cells in a
100 µl suspension

Excitation/Emission maxima
wavelengths:

496 nm, 565 nm / 578 nm

Applications

Tested Applications:

FC (Intra)

Species Specificity:

mouse

Positive Controls:

FC (Intra) : PMA and ionomycin treated BALB/C Th17-
polarized BALB/C splenocytes,

Background Information

IL-17A, also named as IL-17, is a proinflammatory cytokine. IL-17, synthesized only by memory T cells and natural killer cells, has pleiotropic effects, mainly in the recruitment and activation of neutrophils. This cytokine regulates the activities of NF-kappaB and mitogen-activated protein kinases. This cytokine can stimulate the expression of IL6 and cyclooxygenase-2 (PTGS2/COX-2), as well as enhance the production of nitric oxide (NO). High levels of this cytokine are associated with several chronic inflammatory diseases including rheumatoid arthritis, psoriasis and multiple sclerosis. The IL-17 receptor is a type I transmembrane protein, that is widely expressed on epithelial cells, fibroblasts, B and T cells, and monocytic cells. In psoriatic skin lesions, both Th17 cells and their downstream effector molecules, e.g. IL-17 and IL-22, are highly increased.

Storage

Storage:

Store at 2-8°C. Avoid exposure to light. Stable for one year after shipment.

Storage Buffer:

PBS with 0.09% sodium azide and 0.5% BSA, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1x10⁶ untreated or PMA and ionomycin treated BALB/C Th17-polarized BALB/C splenocytes were intracellularly stained with CoraLite® Plus 750 Anti-Mouse CD4 and 0.1 ug PE Anti-Mouse IL-17A Rabbit RecAb (PE-FcA98005, Clone:230038C7). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer.
