

For Research Use Only

SUMO3-Trap Agarose, Kit for Immunoprecipitation

www.ptgcn.com

Catalog Number: s3tak

Basic Information

Catalog Number:

s3tak

Applications:

IP, Co-IP

Conjugate:

Agarose beads; ~90 um (cross-linked 4% agarose beads)

Host:

Alpaca

Type:

Nanobody

Class:

Recombinant

Description

The ChromoTek SUMO3-Trap Agarose, Kit for Immunoprecipitation consists of an anti-SUMO3 NANOBODY®/VHH, which is coupled to agarose beads. It also contains lysis, wash, and elution buffers that can be used for the immunoprecipitation of SUMO3 and SUMO3 proteins from cell extracts of various organisms.

Specificity/Target

Binds specifically to human SUMO2 and SUMO3 (Small Ubiquitin-like Modifier 2 and 3). The ChromoTek SUMO3-Trap Agarose will immunoprecipitate both monovalent SUMO2/3 and chains formed by the process of SUMOylation. In addition to human SUMO2 und SUMO3, it will also bind to homologs from other mammals.

Elution buffer

2x SDS-sample buffer (Lamml), 200 mM glycine pH 2.5

Affinity (K_D)

/

Storage

Storage:

Shipped at ambient temperature. Upon receipt store at +4°C. Stable for one year. DO not freeze!

Storage Buffer:

20% ethanol

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

The SUMO3-Trap Agarose (s3ta) was used to immunoprecipitate endogenous SUMO3 from HEK293T cells. Samples of the input lysate (I), and bound (B) fraction were analyzed using Western blot using 11251-1-AP (SUMO2/3 Polyclonal Antibody). SUMO3 is highly enriched using the SUMO3-Trap.
